Finance weekly report

George's report to Alan

Week of Mon, Oct 26, 2026 · numbers from 2026-10-mtd

NEEDS ACTION A fixed data rule says something here needs a decision.

Summary

Money is healthy: the online store made $112,400 and the salon $96,500, kept apart. Meta ads return 1.4x and should be cut back; one Amazon item is out of stock.

Goal of the week

Lift online contribution by $2,700 this week

Online contribution after ads, fees and shipping: from $21,300 to $24,000 by Sun, Nov 1, 2026

Moving the Meta dollars to Google and keeping Amazon in stock protects profit without adding spend.

Three paths to the goal

Path 1 Move a quarter of the Meta budget to Google

Google returns 3.1x and Meta 1.4x, so a dollar on Google brings back more than twice as much. Google has $2,300 of budget left.

What to do

- Cut the Meta budget by a quarter for seven days
- Add the same dollars to the Google budget

The numbers behind it

- Google ad return (revenue / spend): 3.1x
- Meta ad return (revenue / spend): 1.4x

Meta spend after cutting a quarter: $4,100 x 0.75 = $3,075

Assumption: A quarter of the Meta spend moves to Google

Test: Run seven days and compare contribution with the week before.

Stop-loss: Stop if the Google return falls below 2.5x.

Risks: A higher Google spend may return less per dollar

Path 2 Restock the Amazon item that is out

One Amazon item is out of stock and 3 more have under three weeks of cover; 600 units are already inbound.

What to do

- Ship the inbound units to the Amazon warehouse
- Order the low-cover items now

The numbers behind it

- Amazon items out of stock: 1
- Amazon revenue: $21,300

Amazon revenue held by staying in stock: $21,300 x 0.05 = $1,065
Assumption: About 5% of revenue is at risk while items are out

Test: Check stock cover again in seven days.

Stop-loss: Stop ordering if cover passes 60 days.

Risks: Cash tied up in stock

Path 3 Send one campaign to engaged online customers

Campaigns earned $6,900 and flows $18,400, and unsubscribes are low at 0.3%, so there is room for one more campaign.

What to do

- Send one campaign to engaged online customers
- Keep the seven-day rule for every person

The numbers behind it

- Revenue from campaign emails: $6,900
- Unsubscribes over sends: 0.3%

A campaign like this month's average: $6,900 x 0.5 = $3,450
Assumption: One more campaign earns half the month so far

Test: Send once and read revenue and unsubscribes after three days.

Stop-loss: Stop if unsubscribes pass 0.6%.

Risks: Fatigue for the people who hear from us often

Reply APPROVE 1, 2 or 3 with the one-time code sent to your phone to choose a path. Nothing is carried out until you decide.

Asked of other divisions

To Online: Which products earn the most profit, and which lose money on a sale?

2 products were sold at a loss this month; the rest earned a profit.

To Salon: How much of the salon revenue comes from frequent clients?

Frequent clients spent $48,200 of the salon revenue.

What each worker found

Email (on track)

Email earned $25,300 so far this month, most of it from flows

Based on: Revenue from flow emails $18,400; Revenue from campaign emails $6,900; Unsubscribes over sends 0.3%

Google Ads (worth a look)

Google Ads returns 3.1x, with $2,300 of budget left

Based on: Google ad spend $9,200; Google ad revenue $28,520; Google ad return (revenue / spend) 3.1x

Meta ads (needs action)

Meta ads return 1.4x, below the level that pays for them

Based on: Meta ad spend $4,100; Meta ad revenue $5,740; Meta ad return (revenue / spend) 1.4x

Amazon (needs action)

Amazon sold $21,300, and one item is out of stock

Based on: Amazon orders 412; Amazon revenue $21,300; Amazon fees $3,195

Walmart (worth a look)

Walmart sold $6,800 and one item has low cover

Based on: Walmart orders 133; Walmart revenue $6,800; Walmart fees $1,020

Online store money (worth a look)

The online store made $112,400, and supplier bills are open

Based on: Online revenue $112,400; Online gross profit $58,400; Online contribution after ads, fees and shipping $21,300

Salon money (on track)

The salon made $96,500, kept apart from the online store

Based on: Salon revenue $96,500; Salon gross profit $52,100; Salon labor cost $31,800
